Get Unstuck and Start Growing Your Dream Garden!

Whether you're aiming for suburban curb appeal, balcony beauty, or homestead self-sufficiency, you're facing the same basic challenges:

(icon) How to Start Strong, Healthy Plants	(icon) How to Nourish Your Soil for Maximum Yield	(icon) How to Grow Thriving Plants in Containers	(icon) How to Protect Tender Plants Affordably
--	---	--	--

This special 4-workshop series will give you the foundational info you need to succeed!

Meet your Instructor, Carmen Lamoureux

Carmen Lamoureux has had a varied career, spending her early years working for the Alberta government in the fields of sustainable resource management and forestry and consulting privately on silviculture, soils, and horticulture. Now, as the wildly popular lead instructor for the Verge PDC, as well as founder and owner of Calgary's Urban Farm School and Urban Permaculture Project, she is dedicated to helping emerging gardeners and permaculture enthusiasts gain the freedom, confidence, and skills they need to live more abundant, sustainable, and resilient lives. Having grown food organically for more than 40 years, Carmen gets excited about helping her students cultivate great food and great lives.

Core Skills for Abundant Gardens at Any Scale

Get the proven tools you need to overcome overwhelm, dive in, and set yourself up for an abundant harvest!

(icon) Learn, Grow, Succeed Simple techniques and practices you can use in any space of any size	(icon) Discover Your Options Expert info to eliminate choice overload and make decisions a breeze	(icon) Find Your People Study/networking groups to connect with classmates in your bioregion.

Hi there!

No matter whether you're a veteran permaculture designer or envisioning your first garden, success always comes down to basic skills. And so, thanks to many community requests, Verge is offering a very special, back-to-basics workshop series to start you off on the right foot:

Resilient Garden Fundamentals

With Carmen Lamoureux

A 4-part Verge Workshop Series

[dates]

These in-depth, self-contained workshops, led by Verge's permaculture master gardener and lead PDC instructor, will give you the knowledge, practices, and tools you need to move from confusion to confidence!

Seed Starting 101:

Choosing the right soil mix and seeding technique to create ideal conditions for each plant to thrive.

Healthy Soil, Healthy Plants:

Diagnosing and amending your soil the natural way for lush greenery and abundant harvests

Container Gardening for Everyone:

Tailoring the perfect soil mix, container type, and watering regimen to fit each plant's needs

Small Greenhouse Basics:

Managing temperature control, pests, and watering in your small greenhouse or hoop house

Let's face it - we've all had the experience of investing \$\$\$ in our garden, only to harvest a couple of tomatoes and a pepper or cucumber or two. "How is this saving me money?" you wonder -- sound familiar?

These workshops will turn that pattern around! Once you learn how to set up the conditions for a successful garden, you'll be astonished at your harvests. You'll master:

- Simple, powerful techniques and practices you can adapt to any space of any size
- Expert info to eliminate choice overload and make decisions a breeze
- Proven strategies to keep your plants healthy and thriving - under cover or in the open!

Whether you're gardening to create a beautiful green haven, to obtain an abundant yield, or both, you can't afford to miss the time-tested principles that Carmen presents in each workshop. You'll be working in peer study/support groups with classmates from your bioregion and have the opportunity to share local resources and solutions and build connections that can last far beyond these four weeks!

Don't pass by this opportunity to establish or refresh your core gardening skills and boost your yield next season. Sign up today for Resilient Gardening Fundamentals!
